The institut supérieur des arts de Toulouse is a Public Institution for Cultural Cooperation organised into two departments that each have an autonomous curriculum. While the performing arts department trains musicians and dancers, the courses offered at the fine arts departments are organised into three options: art, design, and graphic design. Both departments are engaged in international partnerships and in an active cooperation with the artistic structures of the city and the region.

Research

The research develops itself through the involvement of professors in artistic, pedagogical or theoretical research and research programs conducted within the institution itself.

These programs are developed by isdaT teaching team, artists, theorists or designers, in association with artistic organizations, national and international research laboratories, higher education schools, and are part of course work, in order to introduce and develop students' research abilities.

Field trips, conferences, workshops, exhibitions and publications are associated with these projects, all of which form a written and artistic body of work.

Exhibitions policy

- ✗ The Palais des arts (300 m²) and the Galerie du quai (90 m² +15m²), are where the students enjoy access to sites of presentation and layout experimentation that are also sites of exhibition for guest artists. This programming creates strong permeability between pedagogy and professional experience, since the students are involved in assisting with mounting the exhibitions of the guest artists.
- ✗ “Mur” is an experimental gallery for fourth- and fifth-year students stems from an internal call for projects. Its configuration determines the forms of projects presented and allows students to reflect on the particularities of this space placed at the entrance to the School, in a thoroughfare frequented by all.

International exchanges

As a result of the long tradition of exchange programs, the Institute is in partnership with a vast network of institutions.

It encourages the students to have an experience studying abroad in the course of the year 4. Schools that are partners:
